

745 - Non-contact Voltage Tester Overview

The Testo 745 non-contact voltage tester means you can quickly and easily determine voltage or de-energization. In contrast to most other models on the market, it has a filter for high-frequency interference signals which enables reliable voltage indication. If voltage is determined, the instrument gives a warning via a clear visual and acoustic signal.

Features

- Voltage range up to 1,000 V
- Waterproof and dustproof according to IP 67
- Adjustable for phase detection or voltage indication
- Visual and acoustic signal
