

830 T1 - Infrared Thermometer Overview

The Testo 830-T1 IR thermometer with laser measurement spot marker and 10:1 optics is suitable for non-contact surface temperature measurements in any industry.

Features

- High resolution processor for utmost accuracy (resolution 0.1 °C)
- 10:1 optics for precise measurements even at medium distances
- IR thermometer with 1 point laser measurement spot marker to target the measuring point
- Two alarm limit values that can be defined as required
- Visual and acoustic alarm if limit value exceeded
- Min./max. value display and hold function (to record a measured value)
- Convenient one-handed operation thanks to the ergonomic gun-style design
- Clear, illuminated digital display
