

MI 3123 SMARTeC Earth / Clamp Overview

The MI 3123 SMARTeC Earth / Clamp is a new generation earth resistance tester with the ability to perform 4-wire earth resistance measurement and 4-wire specific earth resistance measurement.

Features

- Supports all types of earthing resistance measurements:
- Standard earthing resistance measurement with spikes
- Selective earthing resistance test with one current clamp
- Selective (contact less) earthing resistance with two current clamps - Specific earth resistance measurement
- Leakage current tests with current clamps
- Load current tests with current clamps
- High accuracy, high immunity against external noise
- Preprogrammed limits
- PASS/FAIL evaluation of measurement result
- Bright GREEN/RED indicators provides visual evaluation of results
- Suited for testing on CAT IV installations
- Magnetic holder enables hands-free operation
- Built-in battery charger
- Two level memory structure for saving test results and parameters
- Basic downloading with EuroLink PRO PC SW package
- Compatible with EuroLink PRO Plus PC SW package
- USB and RS232 ports
- Robust and ergonomic design
