

## MultiServicer XA MI 3321 Overview

The MI 3321 MultiServicer XA is a multifunctional portable test instrument designed to perform all measurements for testing the electrical safety of portable electrical equipment, machines and switch gears. It also covers all the tests specified as per IEC/EN 60204 ed. 5 including Loop Impedance, RCD and HV tests.

### Features

- 3 in 1 instrument performs testing of portable appliances, machines and switch gears including functional and leakage tests for DUT's with nominal power up to 3.5kW
- Up to 18 different measurements can be performed as either a single test or pre programmed test sequences
- Programmable limits for pass/fail evaluation
- Project uploading / trend functionality, previous test data can be uploaded from PC for fast retesting of equipment
- Scan and test, optional barcoding system and pass/fail barcode label printing available
- Support for advanced RFID identification system
- Easy to use, large LCD screen, full QWERTY keyboard and help screens
- Up to 6000 test results can be stored in two level memory and downloaded to the PC
- Includes PATLink pro software
